1) Total number of reserve words upto Java 7?
2) keywords used for dada type?
3) keywords used for flow of control?
3 kywords used for modifiers?
4) keywords used for exception handling?
5) class related keywords
6) Object related keywords
7) method return type related keyword
8) Why Java is called strongly typed programming language?
9) Is Java 100% pure object oriented Program Language?
10) In java, how many primitive data types are available?
11) size of byte,short,int,long,float, double,boolean and char data type
12) Why size of char data type is 2 byte in java?
13) What is mean by instance variable?
14) When instance variable will be created?
15) How many copies of instance variable will be created?
16) Where instance variable will be stored?
17) If we are not initialize instance variable then what will happens?
18) When we should go for instance variable?
19) How to access instance variables?
20) What is mean by static variables?

21) When static variables will be created?
22) How many copies of static variables will be created?
23) Where static variables will be stored?
24) When we should go for static variable?
25) How static variables will be accessed?
26) What will happens, if we are not initialize static variables
27) What is mean by local variable?
28) When we should go for local variable?
29) When local variables will be created?
30) How many copies of local variables will be created?
31) Where local variables will be stored?
32) Which modifier is applicable for local variable?
33) What will happens,if we are not initialize local variable?
34) Who checks main method is present in a class or not?
35) Why main method is public?

36) Why main method is static?
37) Why main is return type is void?
38) At run time JVM always check which main method?
39) Which modifiers are applicable for main method?
40) Which of the following concepts are applicable for main method?
    i) overloading ii) overriding iii) method hiding
41)Which compiler is used to compile a java program?
42)state the features of JAVA?
43) Number class files generated are depends on which thing?
44) What is difference between Jdk, JRE and JVM?
45) Who is father of Java?
